Lists

- This is a list.
- A compact list.

Wow.

- This is a list.
- A sparse list.

A definition list below.

Reflexivity $a \sim a$

Antisymmetry $a \leq b \land b \leq a \implies a = b$

Transitivity $a \leq b \land b \leq c \implies a \leq c$

Citations

Blah [Tai+, 1, chapter 3, sec. 2, theorem 3]. Blah blah [Tai+; TP]. Blah blah blah[2].

[2] This is a footnote

Code

```cpp
#include<bits/stdc++.h>
using namespace std;

int main(){
    return 0; // 返回 0
}
```

```
example : (∀ x, p x → r) → ((∃ x, p x) → r) := by
  intro h ⟨a, hpa⟩ -- you may also `rcases` explicitly
  exact h a hpa
```

Figures

Figure: This is a figure

Referable Figure 1.

Computations

Beamer format temporarily disabled due to Quarto Issue #13372.

Theorems I

Theorem (Test)

This is a theorem.

$$\sum_{d|n} \varphi(d) = n$$

Proof.

This is a proof ended with a display math.

$$\sum_{d|n} \mu(d) = [n = 1]$$

Theorems II

Proof.

This is a really long proof. □

Definition

This is a definition.

Example (An example)

This is an example.

Solution

This is the solution to the example.

Theorems III

Exercise

This is an exercise.

Remark

This is a remark of Exercise 1.

Lemma

This is a lemma.

Corollary

This is a corollary of Theorem 2.1.

Theorems IV

Proposition

This is a proposition.

Conjecture

This is a conjecture.
